

INNOVATING FILTRATION SOLUTION
for every Industrial Need

PPH HOUSING FILTER

A PPH one-piece filter housing is a sturdy option for industrial filtration, crafted from polypropylene (PPH) in a single, robust design. These housings are engineered to withstand corrosion, chemicals, and high temperatures, making them dependable in challenging industrial environments. Their streamlined construction simplifies installation and maintenance by reducing the number of components, ensuring consistent and efficient filtration performance over time.

These filter housings find widespread application across various industries including pharmaceuticals, food and beverage production, water treatment, and chemical processing. Their versatility is reflected in the range of sizes and configurations available, accommodating different types of filter cartridges and flow rates to suit specific operational requirements. In pharmaceutical settings, these housings play a crucial role in maintaining purity during drug manufacturing processes.

They also contribute to the cleanliness and safety of products in the food and beverage industry by effectively removing contaminants. Water treatment facilities rely on them to ensure the quality of drinking water, while chemical processing plants use them to separate impurities and maintain operational efficiency.

The strength of PPH one-piece filter housings lies not only in their material resilience but also in their straightforward design that minimizes the risk of leaks and enhances overall reliability. By integrating durability with ease of use, these housings support essential industrial processes where cleanliness and consistency are paramount. Their ability to withstand harsh conditions while providing efficient filtration makes them indispensable components in modern manufacturing and processing operations, ensuring reliability, sustainability, and optimal performance.

PPH HOUSING FILTER

PRODUCT PARAMETERS

MODEL DESCRIPTION

MMPF--2 A---P---R---K
1 **2** **3** **4** **5** **6**

Model	MMP: Company, F: One-piece filter housing	
Filter Bag Size	1: $\phi 7" \times 17" L$ ($\phi 180 \times 430 \text{ mm}$) 2: $\phi 7" \times 32" L$ ($\phi 180 \times 810 \text{ mm}$) 3: $\phi 4" \times 15" L$ ($\phi 105 \times 380 \text{ mm}$)	4: $\phi 6" \times 20" L$ ($\phi 150 \times 510 \text{ mm}$) 6: $\phi 7" \times 22" L$ ($\phi 180 \times 560 \text{ mm}$)
Upper Cover Style	A: Screw top cover, B: Lifting ring gland AX: Screw top cover, the water inlet and outlet are union type.	
Main Material	P: PPH	
Upper Cover Joint	D: Internal tooth PT1/2 (with plug, without pressure gauge), R: External tooth PT1/2 connector (with pressure gauge), E: Exhaust valve (with pressure gauge)	
Protection Switch	None: Without protection switch, K: Install protection switch (micro switch type)	

SPECIFICATION

MODEL	IN-OUTLET (MM)	FILTER BAG (MM)	FILTER AREA (M2)	HOUSINGS CAPACITY/WEIGHT (L/ KG)	MAXIMUM TRAFFIC (M3/H)	OPERATING TEMPERATURE (°C)	MAX PRESSURE (MPA)
MMPF-1A-P	50x50	180x430	0.25	20.3 / 15.3	20	90	0.8
MMPF-2A-P	65x65	180x810	0.5	32 / 24.2	40	90	0.8
MMPF-2B-P	65x65	180x810	0.5	32 / 24.2	40	90	0.8
MMPF-4A-P	40x40	105x380	0.12	6.5 / 5.9	12	90	0.8
MMPF-4AX-P	40x40	105x380	0.12	6.5 / 41	12	70	0.6
MMPF-5A-P	50x50	150x510	0.3	2.8 / 10.8	22	90	0.8
MMPF-6A-P	65x65	180x560	0.35	24 / 18	25	90	0.8
