

CORE FOR FILTER CARTRIDGE PRODUCTION

Durability, precision, and strength

mmp stands out as one of the few companies in India with the specialized capability to manufacture the core essential for filter cartridge production. The cores crafted by **mmp** for filter cartridges incorporate advanced technology and undergo stringent quality control measures. These cores offer vital support to the filter cartridges, ensuring they maintain their shape over an extended period.

Manufactured from Polypropylene, this core ensures longevity and resistance against a broad range of liquid impurities and water pressures. It incorporates both rounded perforations for enhanced flow and slotted types to minimize fiber migration under high pressure. The selection of this material ensures an extended lifespan, ensuring consistent high-quality filtration.

The use of Tinned Steel Core elevates stability and toughness. This stainless steel core fortifies the cartridge, guaranteeing reliability and consistent performance throughout its usage.

Carefully engineered with a 28mm Inner Diameter, our core ensures uninterrupted water flow, optimizing filtration efficiency. Our product is available in 10", 20", 30", and 40" single drawn core variants, providing adaptability for a variety of filtration setups.

mmp's cores for filter cartridges are renowned for their durability and strength, making them a preferred choice, particularly in string wound filter cartridges. These cores play a crucial role in preserving the shape and structure of the cartridge over an extended period.

USE OF PRODUCT IN VARIOUS INDUSTRIES

PETROLEUM

CHEMICAL

PHARMACEUTICALS

FOOD & DAIRY

METALLURGY

CEMENT

ENERGY

CORE FOR FILTER CARTRIDGE PRODUCTION

Technical Name	Core for Filter Cartridge
Raw Material	Polypropylene Stainless Steel Core Tinned Steel Core
ID	28 mm
Length	10", 20", 30", 40" Single Drawn Core

Office Address:

C3-602 Anushruti Tower, SG Road, Thaltej,
Ahmedabad – 380059 Gujarat, India
