

WOUND FILTER CARTRIDGE MACHINE

mmp is proud to be one of the few companies in India to design and manufacture their own Wound Filter Production Machine. Our fully Make-In-India machine, designed by our experts to cater specifically to the unique needs of the consumers worldwide. This advanced wound filter making machine is engineered to efficiently produce wound filters of various sizes and materials, offering unparalleled customization capabilities.

KEY FEATURES AND BENEFITS

Precision Control: Equipped with a variable AC frequency drive and motor for enhanced precision and control over the winding process, with adjustable speeds.

Versatile Power Options: Operates on standard or single-phase power (AC 220V/50HZ).

Dual Spindle Operation: Features two spindles to produce two wound filter cartridges simultaneously, each with different or same lengths.

Advanced Automation: Automatic stop sensors and manual timing gear ensure precise winding patterns.

Ease of Use: Designed for user-friendly operation with almost zero maintenance.

Material Adaptability: Supports winding core materials such as Polypropylene, Stainless Steel, or Tinned Steel.

Flexible Winding Lengths: Accommodates various winding lengths, allowing for the production of filters in different sizes with ease.

WOUND FILTER CARTRIDGE MACHINE

mmp[®]

TECHNICAL SPECIFICATIONS

Machine Name	String Wound Filter Machine
Drive and Motor	Variable AC frequency drive and motor
Power	220V/50HZ, Single Phase
Winding Core Material	Polypropylene, Stainless Steel, or Tinned Steel
Winding Tube Diameter	28mm
Winding Lengths Available	222, 235, 250, 254, 500, 508, 750, 762, 1000, 1016, 1270, 1778 mm
Automatic Stop Sensor	Activates at desired cartridge diameter
Winding Outer Diameter (OD)	45 mm – 200 mm
Pattern and Precision	Achieved through timing gears
Maintenance	Designed for minimal maintenance

WHY CHOOSE mmp WOUND FILTER CARTRIDGE MACHINE?

With our machine, you are assured of:

High Efficiency Maximizes production output with minimal downtime.

Precision Timing gears ensure accurate and consistent winding patterns.

Customization Flexible settings to meet specific filter size requirements.

Reliability Robust construction and almost maintenance-free operation ensure long-term reliability.

Join the growing number of satisfied clients who trust **mmp** for their filtration needs. Experience the future of wound filter production with **mmp**.
